

## How Apple Juice is Produced and Distributed

Watch the “How Apple Juice is Made” video. Use it to number these 12 steps in the correct sequence.

- \_\_\_\_\_ Some of the juice is stored in giant containers in a sterile warehouse.
- \_\_\_\_\_ Apples are chopped up into little pieces in the grinder.
- \_\_\_\_\_ The juice is pasturized by heating it up.
- \_\_\_\_\_ Consumers can enjoy apple juice at any time of year.
- \_\_\_\_\_ Macintosh apples are harvested in October.
- \_\_\_\_\_ The apple pieces are squeezed in a hydraulic press.
- \_\_\_\_\_ The juice is filtered a final time.
- \_\_\_\_\_ Apples are inspected, and the leaves are separated from the apples.
- \_\_\_\_\_ Apple juice containers are filled and sealed.
- \_\_\_\_\_ Apples are washed, which also takes out pebbles that were picked up with apples that had fallen on the ground.
- \_\_\_\_\_ Filters separate the juice from the solid apple parts.
- \_\_\_\_\_ Bottles are shipped all over the United States.

## How Orange Juice is Produced and Distributed

Watch the “How Orange Juice is Made” video. Use it to number these 11 steps in the correct sequence.

- \_\_\_\_\_ Some of the pulp is added back into the juice.
- \_\_\_\_\_ Orange juice is poured into cartons.
- \_\_\_\_\_ Oranges are sorted by size.
- \_\_\_\_\_ Tasters check the quality of the orange juice.
- \_\_\_\_\_ Oranges are washed out of the trucks.
- \_\_\_\_\_ Orange juice is shipped all over the United States using trains and trucks.
- \_\_\_\_\_ Oranges are pressed onto metal prongs to squeeze out the juice.
- \_\_\_\_\_ Trucks bring the oranges to an orange juice processing plant.
- \_\_\_\_\_ Lots of rain and sunshine help oranges and other citrus fruits grow.
- \_\_\_\_\_ Everyone can enjoy drinking orange juice.
- \_\_\_\_\_ Oranges are harvested in Florida. (Different varieties ripen at different times of year.)
