

Testing Magnetic Properties

Question: What kinds of materials will magnets stick to?

Hypothesis: I think that magnets will stick to _____.

Experiment: Using a magnet, test at least 10 different objects to see if magnets stick to them. (Remember, do NOT test anything electronic!) Record your observations below.

Things That <u>Do</u> Stick to Magnets	Things That <u>Do Not</u> Stick to Magnets

Conclusions: Magnets only stick to things that are _____.

Magnets do not stick to all _____ things, however.

Publish (shared by teacher): Magnets stick to things made with _____ or _____.
