

Survival Kit Directions & Rubric

Goal: Create a survival kit that will keep humans alive when they visit your planet.

Have a container with a lid that will hold all the items in your survival kit.

Label the container with the following information:

- * Survival Kit (or similar title) for _____ (your planet's name)
- * Manufactured (or similar word) by _____, _____, _____ (partners' names)

Choose or create 10 items that will help a human survive on the planet.

Include a "contents" list that lists each of the items and tells how they will help the human deal with conditions on your planet. These should address all the areas you researched in the "Habitability for Humans" section of your Guiding Questions Research Form.
