

Clearly Different!

Question: What properties of water might you use to find out which Erlenmeyer flask contains water?

Hypothesis: I think that I can use these properties of water to identify which liquid is water:

Experimental Procedure:

Carefully observe each of the clear liquids in the three Erlenmeyer flasks. Record your observations here.

Erlenmeyer flask #1 _____					
Erlenmeyer flask #2 _____					
Erlenmeyer flask #3 _____					

Conclusions: I infer that _____

The properties that helped me draw this conclusion were _____

Publish: I shared my conclusions with _____ other scientists. Their conclusions were _____

Based on our discussions, I think that my conclusion _____
