

Measuring Matter Unit Review Poster

Your team will be assigned one of these scientific concepts to present to the class. Remember, as scientists, use precise language to clearly communicate your information!

- ★Plan your poster to include all the required information about your topic.
- ★Organize it to make sense to the viewer.
- ★Choose appropriate text colors and sizes to be easily viewable from a distance of at least 15 feet.
- ★Use images to make it appealing to the viewer. Use correct grammar and writing conventions.

Circle the concept that your team has been assigned:

- mass
- volume of a liquid
- volume of an irregularly-shaped solid
- volume of a rectangular prism (box-shaped) solid
- density

Required information:

- ☐ Title clearly stating your topic
- ☐ definition of your topic (mass, volume, or density)
- ☐ complete procedure steps that need to be followed to measure your topic
- ☐ an image and label telling the scientific tool or tools that are used to measure your topic
- ☐ information about whether your topic would change or would not change, if it were measured on the moon
- ☐ names of scientific team members
